

NEWS RELEASE
DR. SWINEHART SPEAKS AT A.A.D. ANNUAL MEETING

Dr. James Swinehart was a moderator at the centerpiece symposium of the annual convention of the American Academy of Dermatology, held in Denver, Colorado, on March 21, 2014. This course, one of the highlights of the gathering, demonstrated the use of skin fillers and botulinum products. Actual patients were injected by dermatologists, while a simultaneous demonstration of the involved muscles, nerves and vessels was demonstrated on stage by a Ph.D. anatomist. Dr. Swinehart was responsible for selecting and screening most of the patients for this program.
